

MODS 2FA registration

Registration procedure for Secsign 2FA. This procedure is applicable when logging in for the first time outside of the MARIN network. The procedure can be repeated indefinitely. If you cancel the procedure you can simply restart it.

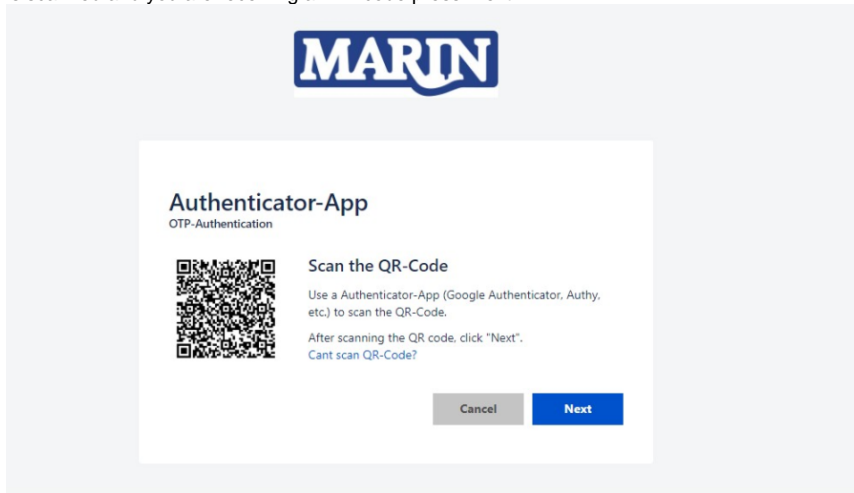

Step 1:

Log in as per regular procedure.

The image shows a login page for MARIN. At the top center is the MARIN logo, which consists of the word "MARIN" in white capital letters on a blue rectangular background. Below the logo is a white rectangular box containing the login form. Inside the box, the text "Hello there!" is centered, followed by "Lets get some work done". Below this is a "Username" label and a text input field containing "gebruikersnaam" with a clear button (an 'x' in a square). Below the username field is a "Password" label and a password input field with masked characters "*****" and a toggle button (an eye icon). Below the password field is a checkbox that is checked, with the text "Remember my username". Below the checkbox is a blue button with the text "Log in". Below the button is a small icon of a person with a plus sign, followed by the text "login protected by SECSIGN". At the bottom of the white box are two links: "Login with SecSign ID" and "Forgot Login?". The entire login form is centered on a light gray background.

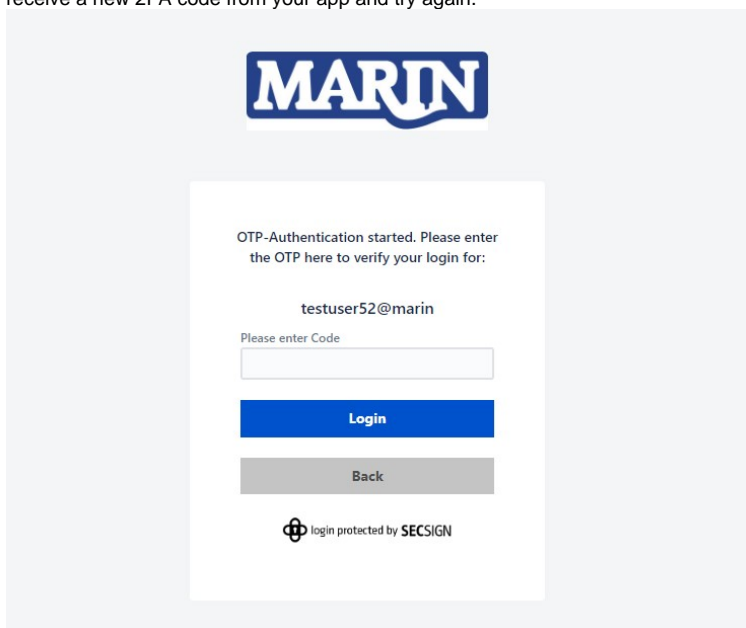

Step 2:

You will receive a QR code which can be scanned with an app of preference (I.e. Authy, Google Authenticator, Microsoft Authenticator). When the QR is scanned and you are receiving a 2FA code press "next".

Step 3:

Enter the 2FA code you are receiving trough the 2FA app and press "next". Should you receive the message the code is not valid, wait until you receive a new 2FA code from your app and try again.

Ready to use!
