

INSTR

INSTR

returns the number of coinciding positions of a sub string in a string

Syntax

INSTR([Pos%],Search\$, Pattern\$)

Arguments

- Pos% is optional and a numeric expression that sets the starting position for each search. If omitted, search begins at the first character position.
- Search\$ is required and a string expression being searched.
- Pattern\$ is required and a string expression sought in the search string.

Examples

INSTR("Qnowledge Wageningen", "Ede")

returns 0

INSTR("Qnowledge Wageningen", "Wageningen")

returns 11

INSTR(12, "Qnowledge Wageningen", "Wageningen")

returns 0
