

LCASE\$

LCASE\$ returns a lower case string value for a (mixed) upper/lower case string value.

Syntax

LCASE\$([StrExpr](#)\$)

Arguments

- [StrExpr](#)\$ is a String Expression

Remarks

1. "[NullString](#)" is considered as a [DETERMINED](#) empty string.

Examples

The syntax

```
LCASE("Qnowledge")
```

returns

"qnowledge"

The syntax

```
LCASE$("NullString")
```

returns

["NullString"](#)
