

TRUNC

TRUNC returns a truncated (cut off) value

Syntax

TRUNC([NumExp](#), NumVal)

Arguments

- [NumExp](#) is the value to be truncated;
- [NumVal](#) is the number of decimal places that is to be maintained (should be a value).

Remarks

1. Please note that truncating is NOT equal to rounding or defining decimal places in Slots & Properties. It really cuts off the number on a defined number of decimals;
2. For rounding please use the [ROUND\(\)](#) function;

Examples

TRUNC(A,3)

for A=2.274825638 returns

2.274
