

@CHAR

The **string relation** attribute @CHAR is used to define the indicator for the single value parameters in a template document. Default value is '~'.

Syntax

Place @CHAR:Character in the data slot of the relation

Arguments

- Character is the character to be used

Remarks

Defines parameter tag symbol for a relation using a [TEMPLATE\\$\(\)](#) , [WINWORD\\$\(\)](#) or [CLUSTER#\(\)](#) function.
