

@DOCUMENT

The **parameter, relation or constraint** attribute @DOCUMENT is used to link a document to a frame and show this document when selected in the workbase or knowledge browser.

Syntax

Place @DOCUMENT:DocumentPath+DocumentFileName in the data slot of the parameter, relation or constraint

Arguments

- The combination of DocumentPath and DocumentFileName makes the absolute path/position to find the document

Member of functional group: [Presentation](#)

Member of knowledge base type: [Classic and general type](#), [Scenario type](#) and [Taxonomy type](#)
