@QUALITYTYPE

The **relation** attribute @QUALITYTYPE is used to define whether the relation is based on physics or empiricism .

Syntax

Place @QUALITYTYPE in the data slot of the relation

Remarks

The only purpose of this attribute is that the Modeler does not accept two Empirical relations with the same left term parameter within a single solution object. This would lead to meaningless results.

Member of functional group: Modeling

Member of knowledge base type: Classic and general type, Scenario type and Taxonomy type
