

@TRANSPARENT

The **entity** attribute @TRANSPARENT is necessary to make a container entity invisible in constructions for which you want to create child entities below a table of which the number of cases is not equal to the number child entities.

Syntax

Place @TRANSPARENT in the value of QEntityData of the container entity

Remarks

This attribute is included in the value of QEntityData of the intended transparent entity. The @TRANSPARENT entities in a solution can be revealed by toggling the Hide mode with Ctrl-H.
