

@SAVEINSOURCE

The **value or string parameter** attribute @SAVEINSOURCE is used to save the value computed or provided in the parameter in the entity in equal to the EntityID used in the Entity relation of for the parameter.

Syntax

Place @SAVEINSOURCE in the data slot of the parameter

Remarks

When a parameter is computed with Entity-relation: Parameter_i=ENTITY#(EntityID, ORCA(1)).Parameter_i, combined with for instance [@MODIFY](#), the storage of the resulting value will be stored in the defined EntityID of the relation used to determine the original value.
