

@ONINPUTGOTO

The **entity** attribute @ONINPUTGOTO is used in QEntityData if you want to force the workflow to go to the entity with the given entity ID, only if input has been provided.

Syntax

Place @ONINPUTGOTO:EntityID in the data slot of the entity

Arguments

- EntityID is the QEntityID value of the Qentity object you want to go to after leaving this entity when you have provided new input or changed existing input
