

@SELECTENTITYKEYTEXT

The **value or string parameter** attribute @SELECTENTITYKEYTEXT is used to define the standard key text for selection in a table of the Entity selection list.

Syntax

Place @SELECTENTITYKEYTEXT:StandardKeyText in the data slot of the parameter

Arguments

- StandardKeyText is the standard case description in the generated list to indicate the meaning of a case, e.g. 'Condition'. The cases are then indicated by 'Condition #nr'.
