

@CHECKCRLF

The **relation or constraint** attribute @CHECKCRLF is used in combination with the [GET\\$](#) function to replace single Carriage Return characters by a Carriage Return Line Feed [Crlf](#) combination.

Syntax

Place @CHECKCRLF in the data slot of the relation or constraint

Remarks

This attribute is used in an expression using the [GET\\$](#) function to replace single Cr's ([CHR\\$\(13\)](#)) into [Qcrlf](#) ([CHR\\$\(13\)](#) + [CHR\\$\(10\)](#)) as some software produce output or documents without LineFeed characters.
