

@PENDING

The **value or string parameter** attribute @PENDING is used to define a default value for the parameter when its (case) value is not available in an object or [TeLiTab](#).

Syntax

Place @PENDING:Value in the data slot of the parameter

Arguments

- Value is the default value when the parameter is [PENDING](#)

Remarks

When the attribute is included, the system will not issue a warning if no value is found but simply use the value specified as selection result. Also interesting in these situations is the [@ASKUSERIFNA](#) attribute.
