Getting started

Thank you for purchasing this MARIN software product. Getting started provides help in getting your MARIN product installed and activated.

Before starting the installation, make sure that your computer meets the system requirements.

Two to three steps to install and activate your MARIN software product:

1. Install the product that you bought on your PC(s) with the setup.exe on the product installation medium (DVD or USB device).
2. Optional: if you received an Activation ID, install the MARIN Product Activation Tool on your PC(s) with the *Marin Product Activation v11.11.3 x86 32bit setup.exe*. This product is located on the installation medium labelled *MARIN Product Activation Resources*.
3. Activate the product by using the Product Activation Tool and your Activation ID or by putting the license file in the installation directory of the MARIN software product. For more information about activation see http://mods.marin.nl/display/Install/Getting+started

This manual can also be found on the MARIN Product Activation Resources installation medium.

The installation requires local administrator rights.

Please read and follow the next steps carefully to successfully install and activate your MARIN software product.

Make sure you know what type of license you have purchased with your product. MARIN supports two kinds of licenses:

- **Node-locked licenses**: A Single-Use license model. The license is tied to just one computer, one specific node.
- **Floating licenses**: A Concurrent-Use license model, also know as a "floating" license, where the software product can be used from any computer within a network that has a network connection to a license server. A limited amount of licenses is shared among a larger group of users.

Installation and activation of your MARIN software product.

The installation requires local administrator rights.

Quick links to product activation

- Product Activation using an Activation ID
- Product Activation using a license file
- Product Activation using a floating license on a license server
