## @QUALITYTYPE

 $\label{thm:continuous} The \textit{ relation} \ attribute \ @QUALITYTYPE \ is used to define whether the relation is based on physics or empiricism \ .$ 

Syntax
Place @QUALITYTYPE in the data slot of the relation

## Remarks

The only purpose of this attribute is that the Modeler does not accept two Empirical relations with the same left term parameter within a single solution object. This would lead to meaningless results.

Member of functional group: Modeling

Member of knowledge base type: Classic and general type, Scenario type and Taxonomy type
