DE Taxonomy Tutorials

Domain Expert Tutorials for Taxonomies

The tutorials for domain experts provide a first look on the use of Quaestor for Taxonomy type of knowledge bases.

Please note that we always assume you use the latest Quaestor release. Any changes to the tutorials required due to a new release will be done the moment this version is released. Furthermore, although we expect that you are able to follow this tutorial without any real previous Quaestor knowledge, it might be wise also to have a look at general topics such as the user interface.

If you have any problem or question during the Tutorials that are not answered, or you discover that some of the Tutorials do not work the way you expect, please do not hesitate to contact us. We are always interested in feedback and improvement to our products.

Available tutorials on Taxonomy type knowledge bases:

- Using a Taxonomy type knowledge base, a Ship Configurator
