

@PICTURE

The **parameter, relation or constraint** attribute @PICTURE is used to define the reference to a binary or picture file.

Syntax

Place @PICTURE (without one addition) or PICTURE:ImageFileName or PICTURE:ParameterName or PICTURE::QBinaryID in the data slot of the parameter, relation or constraint

Arguments

- ImageFileName is the total file name of an image. It is expected that the image is font in your Knowledge base directory: \Kbs\[knowledge base name]\Html\Images. ParameterName is a reference to a parameter with a picture (in case you want to use the same picture for several parameters). QBinaryID is a refence to the QBinaries object in the dataset of the knowledge base.
