

@MINVAL

The **value parameter** attribute @MINVAL is used to define the minimum value.

Syntax

Place @MINVAL:Value or Expression in the data slot of the parameter

Arguments

- Value is the minimum value (it is included in the range!) Expression is a numerical expression that is evaluated each time the range is checked.

Remarks

Please note that if you use an Expression, you are responsible for the availability of the values used in the expression. Values of the current case are used or from the list, if any. See also [@HARD RANGE](#) and [@MAXVAL](#).
