

@SELECTENTITY

The **value or string entity** attribute @SELECTENTITY is used to define the entity (instances) on the basis of which a selection list must be created.

Syntax

Place @SELECTENTITY:EntityID or [TeLiTab#](#) in the data slot of the entity

Arguments

- EntityID is either a numeric value or a parameter of which the value is the QEntityID value of the referred entity/entities. The argument can also be the name of a [TeLiTab](#) set on the basis of which the selection list must be created.

Remarks

Used in combination with the other @SELECTENTITY * attributes
