

The Quaestor Help

To assist knowledge engineers, Quaestor provides information on a lot of topics such as the intrinsic functions, attributes, dimensions, etc. All this information can be found in the Quaestor node in the [Knowledge Browser](#).

@OPTIONLIST

Added by [Hees, Maarten van](#), last edited by [Hees Maarten van](#) on Jun 28, 2012 ([view change](#))

The **parameter** attribute @OPTIONLIST is used as an [OPTIONS] script to define a list of comma separated parameters as selection sequence in the database selection dialog.
