

Options Explanation tab

All options related to the information shown in the [Explanation](#) window.

[blocked URL](#)

You can select and deselect the different information items for Parameters, Relations, Constraints, Functions and Entities. The information itself and order of information is either defined by the [Knowledge Engineer](#), such as pictures, names, text, links to documentation (see also [Documentation of knowledge](#)) or by Quaestor.

For the level of detail, please experiment yourself.
