

Quaestor node

The first node in the Quaestor [Knowledge Browser](#) is the Quaestor node. This node provides access to all information about [intrinsic function](#), [Attribute overview](#), [Dimension overview](#) and [Constants & standard parameters overview](#).

The sub-nodes of the Quaestor node are connected to explanation retrieved from the Quaestor wiki. All information downloaded from the internet requires an Internet connection to <http://www.quaestor.org> . See the [flash demo...](#) for a view of the behavior.

[blocked URL](#)

In the picture above you also see the [Newqkb](#) node. This node indicates an empty knowledge base to start with. **Please note that End-Users and Do main Experts will not see the [Newqkb](#) node due to the lack of knowledge engineering rights.**

Functions sub-node

Selecting this sub-node will show all [intrinsic functions](#):
