

Quaestor Testing Tools

On this page you can find the required tools if you want to personally repeat part of the **Sub-systems or general functionality testing** (see [Testing Quaestor and KB-Systems](#)).

The check what is the latest public release, [click here](#).

The following items are required to test Quaestor:

1. For [Classic knowledge based systems](#) and [Scenario applications](#):
 - a. [\[qknowledge_test_base.zip\]](#)
 - b. [\[qknowledge_release_project.zip\]](#)
 - c. [\[quaestor_qknowledge.qkb_test_procedure.doc\]](#)
2. For [Taxonomy/Configurator applications](#):
 - a. [\[qknowledgeConfigurator_test_base.zip\]](#);
 - b. [\[qknowledgeConfigurator_release_project.zip\]](#);
 - c. [\[quaestor_qknowledgeConfigurator.qkb_test_procedure.doc\]](#);

Download the tools and read the accompanying documentation. Any missing information will be available soon.
