

Disconnect Constraint...

This option enables you to disconnect connected constraint to a selected relation OR connected relations from a selected constraint.

Please note that this option is only enabled when:

- You have selected a relation;
- This relation is connected to one or more constraints;

or

- You have selected a constraint;
- This constraint is connected to one or more relation;

When selecting the menu option after selecting a **relation**, a dialog will open enabling you to select one or more of the connected constraints to disconnect from the **relation**
