

Workbase > Make Report...

This menu option enables a user to make a very basic ASCII document of the selection in the [Workbase](#).

[blocked URL](#)

You can select what type of content should be included and where to create the report to, either the [Report](#) window, the printer or to a file.

Please note that using the right mouse menu in the [Workbase](#) you can access the same functionality but with an additional possibility to create an HTML type of document.

[Quaestor Interface](#)
