Help > My [Q]nowledge

This file option will link you to your personal area on the Qnowledge webpage. The page will be opened in the internal Web Browser.

On this page you can find the following information (depending on your user rights):

- all public and your personal downloads;
- your project status;
- you license(s) information;
- make bug reports and feature requests;
- generate changelogs between different versions of your applications.

When you use the option for the first time, your login and password are requested. These are saved in your personal settings file.
