

Obtaining the host ID on Scientific Linux

1. Open a Terminal.
2. In the Terminal window type "ifconfig > ifconfig.txt" and press Enter.

3. The ifconfig.txt will be in your current working directory.
4. E-mail the ifconfig.txt to support@marin.nl so MARIN can create a license for you. In the e-mail, please specify the program name and version number that you need a license for.
